

Acceptance Criteria

Version: April, 2026

Table of contents

A-wood	3	WEEE Waste	16	Residual waste	33
Asbestos	4	EPS	17	Hoing waste	34
B-wood	5	Cellular concrete	18	Silicone rollers in boxes	35
Big bags (colored)	6	Mixed scrap	19	Pruning wood	36
Big bags (white)	7	Gypsum	20	Non-reusable construction and demolition waste	37
Colored foil	8	Grass	21	Green house foil	38
Tree trunks	9	Organic waste	22	Confidential paper	39
Construction and demolition waste (> 50% reusable)	10	Bulky waste	23	Flat glass	40
Construction and demolition waste (< 50% reusable)	11	Rigid plastics	24	Food products packaged	41
C-wood	12	Hollow glass	25	Pure rubble, fine	42
Roof gravel	13	Infectious substances	26	Pure rubble, coarse	43
Bituminous roofing	14	Insulation material	27	100% natural foil	44
Tar containing roofing	15	Agricultural foil	28	90/10% natural foil	45
		Paper/cardboard	29		
		PD	30		
		PMD	31		
		PP/PET straps	32

A-wood

A wood - untreated (not varnished , painted or treated) wood

Accepted

- (Solid) unpainted, untreated wood such as beams, cut wood, pallets, etc. (maximum 2 m)

Forbidden

- Hazardous waste
- Construction and demolition waste
- Wood B and C
- Burnt wood
- Contamination of the wood with other wastes such as textiles, sand, rubble, soil, roofing, paper, metals, corrugated board, plastics, glass etc.
- Coarse fiberboard, chipboard, triplex, multiplex, hardboard and softboard
- Rotted and trimmed wood/fresh wood
- Rotting or moldy wood
- Wood dust / wood moth
- Wood with nails, screws or bolts larger than 10 mm diameter as well as S-hooks

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Asbestos

Asbestos-containing material and asbestos-like materials from selective demolition or dismantling.

- Selectively demolished asbestos with >10% organic material
- Asbestos containing materials/objects such as roof shees, brake blocks, brake discs, gaskets and insulation material
- Hazardous waste
- Construction and demolition waste
- Asbestos similar material
- Eternit roofing sheets
- Safes
- Industrial waste

Packaging requirements

Asbestos or waste containing asbestos must be presented in closed double layer of sufficient strength (minimum thickness of single packaging 0.2 mm) or in a big bag, container bag or depot bag with an inner liner. The packaging must be marked 'asbestos-containing waste'. Sharp parts and suchlike must be shielded in such a way that the container Sharp parts and the like must be shielded in such a way that the container-depot bag cannot be damaged.

Exceptions to the above packaging requirements may occur and must be discussed in advance, including:

- *Large sizes: if the dimensions of the waste are such that it does not fit into an asbestos bag (long sheets, safes)*
- *Asbestos cement pipes, drinking water pipes or similar materials with a diameter greater than 100 mm. These pipes must be delivered double-wrapped in plastic of at least 0.5 mm thickness*

In the case of waste suspected of containing asbestos, we are required to have an official investigation carried out (€1100). These costs are passed on to the customer. If the investigation reveals that the waste does indeed contain asbestos, the costs of disposal are also passed on to the customer.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

B-hout

Treated wood, or a mix of untreated and treated wood (maximum 2 m)

Accepted

- Hardboard, softboard, fiberboard, MDF, up to 10%
- Plasticized wood
- Particle board
- Pressed wood
- Wood furniture (not rattan) free of coverings and contaminations
- Painted wood; doors and window frames

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- C-wood
- Trespa or other composites
- Woodwool cement board (fiberboard with cement mortar)
- Burnt wood
- Contaminated wood with other wastes such as textiles, sand, rubble, soil, roofing, paper, metals, corrugated sheet, plastics, glass etc.
- Rotted and trimmed wood/fresh wood
- Rotting of moldy wood
- Wood dust
- Hardware, nails, screws or bolts larger than 10 mm in diameter as well as S-hooks

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Big bags (colored)

Woven PP plastic bags for various applications, variegated in color

Accepted

- All sizes PP Big bags
- Dry, celan, various light colors
- With or without PE inliner
- Color variation of loops and seams possible
- With or without print
- Big bags from the food and plastics industries

Forbidden

- Dirty and/or wet Big bags
- Residua of contents:
 - Carbon seams
 - Cement or plaster
 - Chalk
 - PVC
 - Carbon
 - Sticker residua, labels and adhesive tape
 - Other plastic foreign materials
- Big bags from chemical industry

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Big bags (white)

Woven PP plastic bags for various applications, white in color

Accepted

- All sizes PP Big bags
- Dry, clean, white color
- With or without PE inliner
- Color variation loops and seams possible

Forbidden

- Dirty and/or wet Big bags
- Imprints
- Residua of contents:
 - Carbon seams
 - Cement or plaster
 - Chalk
 - PVC
 - Carbon
 - Sticker residua, labels and adhesive tape
 - Other plastic foreign materials
- Big bags from chemical industry

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Colored foil: colored and/or mix of natural and colored (LDPE)

Several types of clean (packaging) foil sourced from the distribution sector, retail outlets and the industry etc.

Accepted

- Colored film (LDPE): clean, colored film or a mix of clean colored film and clean transparent film.

Forbidden

- Laminate/aluminum laminate foils (mostly from the food industry)
- Tape or sticker residue or labels
- Agricultural or horticultural foil, contaminated construction foil and foam foils
- Thermoformed or vacuum pulled foil (PET or PS)
- Packaging foam (EPS, EPE, EPP)
- Other plastics such as big bags, strapping and hard plastics
- Contaminated plastics (paint, cement, grease and food residues)
- Other plastic materials such as hazardous waste, wood, metals and inert streams etc
- Plastic cups and bottles
- Bubble wrap and airbags

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Tree trunks

Tree trunks, stumps and logs that need to be reduced in size before composting.

Accepted

- Tree trunks
- Stumps
- Sawn logs (diameter > 20 cm)
- Thick roots (diameter > 20 cm)
- Wood pulp

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- Fruit and vegetable waste
- Pruning wood
- (Roadside) grass
- Plants
- Manure or fertilizers
- (Contaminated) soil/sand
- Trees/branches with mold

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Construction and demolition waste, > 50% sortable/reusable

Sortable/recyclable waste from construction and demolition work.

- More than 50% reusable material
- Minimum 300 kg/m³

Accepted

Wastes released during construction, renovation and demolition of dwellings, buildings and other structures, such as structures and roads.

- Masonry rubble, concrete rubble, clean plastics, clean film, clean paper and cardboard, ferrous and nonferrous metals, A and B wood, residual construction materials <5%
- Insulation material (including rock wool, glass wool, EPS, wood wool cement board) <5%
- Carpet < 5%
- Flat glass < 5%
- Gypsum/gas concrete <10%
- The percentage of reusable components is at least 50%

Forbidden

- Hazardous (chemical) waste
- Asbestos or asbestos-like material
- Tarred asphalt
- Impregnated wood (C wood)
- Chimney debris, soot residues
- Rolls of carpet
- Tires
- Compound streams
- Soil
- Roofing slate
- Household waste
- Organic waste such as pruning waste and vegetable, fruit and garden
- Refrigerators and other electrical appliances
- Sofas and mattresses
- Pressure containers

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Construction and demolition waste, < 50% sortable/reusable

Sortable/recyclable waste from construction and demolition work

- Less than 50% reusable material
- Maximum 300 kg/m³

Accepted

Wastes released during construction, renovation and demolition of dwellings, buildings and other structures, such as structures and roads.

- Masonry rubble, concrete rubble, plastics, foil, paper and cardboard, ferrous and nonferrous metals, A and B wood, leftover building materials <10%
- Insulation material (including rock wool, glass wool, EPS, wood wool cement board) <10%
- Impregnated wood (C wood) < 5%
- Carpet < 5%
- Flat glass < 5%
- Gypsum/glass concrete < 10%
- Roofing leather < 5%
- The percentage of reusable components amounts to a maximum of 50%

Forbidden

- Hazardous (chemical) waste
- Asbestos or asbestos-like material
- Tarred asphalt
- Impregnated wood (C wood)
- Chimney debris, soot residues
- Rolls of carpet
- Tires
- Compound streams
- Soil
- Roofing slate
- Household waste
- Organic waste such as pruning waste and vegetable, fruit and garden
- Refrigerators and other electrical appliances
- Sofas and mattresses
- Pressure containers

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

C-hout

Impregnated wood (preserved), (railroad) sleepers and wood that has stood in water for a longer period of time (maximum 2 m).

Accepted

- Hardwood
- Railway sleepers (stripped of metal plates and bolts)
- Impregnated or otherwise preserver wood
- Coarse fiberboard

Forbidden

- Hazardous waste
- Construction and demolition waste
- Trespa and other composites
- Fiberboard with cement
- Contaminated wood with other wastes such as textiles, sand, rubble, soil, roofing, paper, metals, corrugated sheet, plastics, glass etc.
- Rotted and trimmed wood/fresh wood
- Wood dust
- Metal parts larger/thicker than 10 mm
- Size > 2 meter
- Burnt wood

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Roof gravel

Roof gravel from renovation and/or demolition of roofs.

Accepted

- Roof gravel
- Density > 1800 kg/m³

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- Asbestos or asbestos-like material
- Tarred and/or bituminous roofing membrane
- Insulation material, demolition debris, sand and/or soil, chimney debris

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Bituminous roofing

Bituminous roofing which is released during renovation and/or demolition of roofs.

Accepted

- Bituminous roofing
- Impurities such as; insulation material, wood, etc. < 5 v%

Forbidden

- Hazardous waste
- Asbestos or asbestos-like material (Contaminated) soil
- Industrial waste
- Insulation material, demolition debris, sand and/or soil, chimney debris and roofing gravel >5v%

Additional information

Bituminous membrane has been used since 1975 and must be delivered separately from tarred roofing leather. Bituminous membrane can be recognized by the following properties: Tough material, clears gravel well, does not melt with temperature increase, has a sweet smell and is difficult to cut.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Tar containing roofing

Tarred roofing leather which is released during renovation and/or demolition of roofs.

Accepted

- Tar containing roofing
- Insulation material, demolition waste, sand and/or soil, chimney waste and roofing gravel < 5v%

Forbidden

- Hazardous waste
- Asbestos or asbestos-like material
- (Contaminated) soil
- Industrial waste
- Insulation material, demolition debris, sand and/or soil, chimney debris and roofing gravel >5v%

Additional information

Tar containing roofing was used until 1980 and must be delivered separately from bituminous membrane.

Tar containing roofing can be recognized by the following characteristics: Brittle, shiny material and mostly attached.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

WEEE Waste / Electronic scrap

Brown goods fall as a category under waste electrical and electronic equipment (WEEE):
Small household appliances & ICT equipment.

Accepted

- Small household appliances; Radios, amplifiers, stereo systems, cassettes, record players, videos, cameras, speakers, kettles, deep fryers, toasters, mixers, garden equipment, vacuum cleaners, sewing machines, irons, hair dryers and shavers, medical equipment and measuring instruments;
- ICT equipment; Telephone and fax machines, mobile phones, copiers, printers, computer mice and keyboards;

Forbidden

- Hazardous (chemical) waste such as: batteries and batteries, mercury switches, glass from cathode ray tubes and other activated glass
- Asbestos or asbestos-like material
- Loose capacitors
- Picture tube holding and flat panel
- White goods
- Appliances contaminated with water, food, chemical waste, oil or grease
- No appliances that have been in contact with radiation and/or body fluids without a decontamination statement on each individual appliance.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

EPS

Various types of EPS, 100% clean (Styrofoam, Tempex) derived from electronics packaging and insulation material from the construction industry.

Accepted

- Clean, 100% Styrofoam/tempex (in large pieces)
- Styrofoam consisting of granules
- Packed in transparent foil bags (400 ltr of 1000 ltr)
- Dry packed

Forbidden

- Colored Styrofoam
- Contamination with sand, paint, cement, etc
- Contamination from food waste, such as EPS from the fish industry
- Packaging chips
- No EPP (expanded PP) and EPE (expanded PE)
- Meat or vegetable trays or other food packaging made of Styrofoam
- Other plastics such as big bags, strapping, foil, rigid plastics
- Contaminated plastics (paint, cement)
- Other plastic foreign materials such as hazardous waste, industrial waste, wood, inert streams, etc.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Cellular concrete

Cellular concrete derived from construction, renovation and demolition.

Accepted

- Cellular concrete blocks

Forbidden

- | | |
|--|---------------------|
| ■ Hazardous waste | ■ Gypsum board |
| ■ Industrial waste | ■ Gypsum blocks |
| ■ Construction and demolition waste | ■ Sand-lime bricken |
| ■ Wood | ■ Pure rubble |
| ■ Asbestos or asbestos-like material (e.g., Eternit, New Technology roofing sheet) | ■ Concrete rubbel |

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Mixed scrap

Mixed metal mostly from municipal yards, waste recycling centers, waste collectors and industry in the form of bicycles, cladding, furniture, profiles, etc.

Accepted

- Ferrous metals, whether or not mixed with nonferrous metals with a thickness > 0.5 mm
- Galvanized (galvanized) and alloy parts (copper, aluminum, stainless steel etc.) < 10%
- Cast iron
- Barrels (iron) will only be accepted, stripped of danger labels (or made completely illegible) and rendered illegible) and rinsed and/or scraped clean
- Other metals, mostly painted material

Forbidden

- AEEA/WEEE waste from electrical and electronic equipment
- Hazardous waste
- Construction and demolition waste
- Industrial waste
- Gas cylinders, LPG tanks, fuel tanks, pressure containers
- Radioactive substances and substances emitting ionizing radiation
- Asbestos and asbestos-like materials
- Odorous, dusty, dust-forming, burning, smoldering wastes
- Liquids and pastes e.d.
- Barrels and paint cans with remnants of contents and danger labels
- Transformers and capacitors (due to PCBs)
- Refrigerators
- Fire boxes
- Ammunition and explosives
- Tires

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Gypsum

Gypsum waste from construction, renovation and demolition.

Accepted

- Gypsum blocks
- Gibo-blocks
- Plasterboards

On delivery, the waste must be free of iron or plastic containing materials

Forbidden

- Hazardous (chemical) waste
- Industrial waste
- Construction and demolition waste
- Wood
- Asbestos or asbestos-like material (e.g., Eternit, New Technology roofing sheet)
- Gas concreteon
- Sand-lime bricken
- Pure rubble
- Concrete rubble

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Grass

Grass and garden and park waste.

Accepted

- Prunings (branches and trunks, diameter < 20 cm)
- Leaves, grass, hedge clippings and flowers
- Plants with adhering sand/soil
- Shrubs with adhering sand/soil

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- Fruit and vegetable waste
- Tree lumps
- Manure or fertilizers (Contaminated) soil/sand
- Packaging waste
- Trees/branches with mold

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Organic waste

Organic waste from households in the form of peelings and scraps from vegetables, fruits and potatoes, leftover cooked food, meat and fish scraps (including bones, shells and bones), peanut and nut shells, egg shells, vegetable oil, congealed fat, weeds, small pruning waste, cut grass and leaves.

Accepted

- Peels and remains of vegetables, fruits and potatoes
- Fine green waste
- Flowers and houseplants
- Wood bark

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- Packaging waste (including bioplastic)
- Manure
- Diapers and other incontinence materials
- Coarse prunings such as stumps and large branches
- (Contaminated) soil/sand

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Bulky waste

Waste materials, which must be reduced in size before they can be processed in an incinerator (waste incineration plant).

Accepted

- Flammable non-recyclable wastes with dimensions greater than 30 x 30 x 60 cm

Forbidden

- Chemical waste
- Asbestos or asbestos-like waste
- Explosives
- Hospital waste
- Radioactive waste
- Electronic waste and major appliances
- Strong dusty or smelly waste
- Tires
- Mattresses
- Cadavers
- Insulation material
- Non-flammable waste such as rubble, sand, glass
- Liquids
- Smouldering substances
- Closed packaging of which the (former) contents are not immediately recognisable, or of which it is not clear whether they have any potentially hazardous properties
- Packagings, not rinsed and/or with danger labels or symbols

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Rigid plastics

Several rigid plastics/plastic articles from recycling centers, sorting companies or certain production waste from companies.

Accepted

- Buckets, crates, laundry baskets and boxes (rinsed/scraped)
- Outdoor furniture (chairs and tables)
- PVC pipes, windows, doors, shutters, cable ducts
- HDPE pipes
- Plastic toys
- Plastic roll container, car bumpers
- Flower pots and trays
- Jerrycans and barrels (rinsed, uncapped and without hazard labels and/or symbols)

Forbidden

- Shredded plastics
- Plastics and plastic articles < 10 cm
- Containers with hazard labels and/or symbols
- Polyester roofing sheets, boats, tubs and skis
- Kit ducts, cartridges, cassettes, garden hoses and floor heating pipes
- Metal and metal parts
- Soft plastics (foils) and polystyrene foam (EPS)
- Foamed and composite articles containing plastic materials to the products such as coolers, car seats (textiles) and WPC (Wood Plastic Compound)
- Contaminated plastics (paint, cement)
- Other plastic materials such as hazardous waste, wood, metals and inert streams etc

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Hollow glass

Empty glass waste that has served as packaging material.

Forbidden

Contaminants that interfere with the recycling process, namely:

- Ceramics, stone, porcelain. This includes gin jugs, plates, cups, pottery, etc. An excessive proportion of pitcher, stone and porcelain may result in weight deduction or rejection
- Heat resistant glass, laboratory glass, oven dishes, hot plates and stove panes are not not under glass
- Refrigerator glass plate, cutting board, etc. fall under flat glass
- Medical or hospital glass: needles, chem, liquids etc. will not be accepted.
- Flat glass

Colour of the pot	Specification
White glass	proportion white glass > 95%
Green glass	proportion green glass > 85%
Brown glass	proportion brown glass > 90%
Bont glass	approx. 50% white; approx/ 40% green; approx. 10% brown

If color glass differs from the stated specification, Valor will accept the glass as variegated glass.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Insulation material

Noncombustible inorganic insulation materials from construction, renovation and demolition and production waste.

Accepted

- Glass wool
- Rock wool
- Other insulation materials such as PUR foams, foils, animal, plastic or synthetic wool
- Dry packed

Forbidden

- Hazardous (chemical) waste
- Industrial waste
- Asbestos or asbestos-like material (e.g., Eternit, New Technology roofing sheet)

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Kraft bags with PE liner

Kraft paper with PE inner liner

Accepted

- Raw material bags from the food industry
- Kraft paper with PE inner liner
- Delivery dry
- Loose PE bags inside

Forbidden

- Bags from the chemical industry
- Bags with PP or aluminum inner liners
- No other contaminants or residual products
- Inner bag not fully bonded
- No cement bags

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Agricultural foil

Clean foil from agriculture.

Accepted

- Only clean LDPE stretch or silage foil
- Delivered clean without large amounts of quantities of soil adhering

Forbidden

- Other materials used in agricultural and horticultural foils, such as feeding bottoms, ropes, clips, hoses, rock wool etc.
- Plants or remains of plants
- Large amounts of sand/soil
- Other plastics
- Waste materials other than LDPE foil
- Hazardous waste and small hazardous waste (KGA)

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Paper/cardboard

Various types of paper and paperboard or mixtures of them.

Accepted

- Clean and printed paper and/or cardboard
- Packaging paper/cardboard

Forbidden

- Wet cardboard or paper
- Rotting or moldy paper/cardboard
- Contaminated, coated and/or plasticized paper and cardboard
- Contaminations of the paper with other wastes
- Binders or ring binders with metal interiors
- Burned paper/cardboard
- Plastic folders
- Beverage cardboard
- Plasticized labels
- Paper/cardboard contaminated with foodstuffs

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

PD

Plastic containers and beverage cartons (consumer packaging).
Use clear garbage bags for PD.

Accepted

- Empty drink cartons
- Empty plastic packaging such as:
 - Cookie and candy packaging
 - Packaging of sandwich filling
 - Plastic bottles (hand soap, shampoo)

Forbidden

- | | |
|--|------------------------------|
| ■ Non-packaging, such as beach balls | ■ Styrofoam |
| ■ Metal packaging | ■ Hard plastics |
| ■ Returnable bottles and cans | ■ Plastic straps |
| ■ Medical packaging materials (such as blood or dialysis bags) | ■ Production waste |
| ■ Wrapping film | ■ Full or half-full packages |

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

PMD

Plastic, metal and drinking cartons

Accepted

■ Empty plastic packages

Packaging for salad, fruits and vegetables, Cups for yogurt, custard and ice cream, Blister packs, Chips packs, Push-through strips, Bottles for detergents, shampoo and soap, Bottles for soda, water, milk, vinegar etc, Squeeze bottles for sauces, oil, Tubs for butter, sauce, cheese spread, Plant pots, Plastic bags and pouches, Packaging of cheese, meat, fish, Bags for pasta, rice, bread, candy etc.

■ Empty metal packages

Aluminum foil, Aluminum trays, Canning cans, Cups from tea lights, Caps from beer bottles, Beverage cans, Foil from dessert trays, Empty metal packaging (tin), Screw tops, Steel syrup bottles, Paint cans (empty and dry)

■ Empty drink packages

Packs or packets for (carne) milk, custard and yogurt, Packs or packets for soup and pasta sauce, Packs and packets for soft drinks, fruit juices, water and wine

Forbidden

■ Plastic packaging or objects

Utensils, Housewares, Kit tubes, Coffee cups, Agricultural plastic, pond liner and rooting cloth, Medical waste such as hypodermic needles or ostomy bags, Nets of tangerines, oranges, onions, Styrofoam trays or packaging, Styrofoam filler, Shopper shopping bags, Toys, Garden chairs and other utensils

■ Metalen packaging or objects

Spray cans of whipped cream, deodorant or hairspray, Paint cans with contents.

- What also does not belong to pmd are all other types of waste such as GFT, paper and cardboard, glass, textiles, residual waste and bulky waste.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

PP/PET straps

PET/PP straps

Accepted

- PP/PET straps
- Hard packaging bands
- Only if collected in transparent collection bags

Forbidden

- No soft packaging straps
- Other packaging materials
- Shredded packaging straps
- Mixed film with the transparent collection bag filled with PP/PET straps
- Other plastics, such as big bags, foils, Styrofoam/ EPS, various rigid plastics
- Other plastics foreign materials, such as hazardous waste, industrial waste, wood, metal, inert streams

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Residual waste

Combustible non-recyclable wastes

Accepted

- Combustible non-recyclable waste from businesses, with dimensions smaller than 30 x 30 x 60 cm

Forbidden

- Chemical waste
- Asbestos or asbestos-like waste
- Explosives
- Hospital waste
- Radioactive waste
- Electronics waste and major appliances
- Highly dusty or odorous waste
- Tires
- Mattresses
- Carcasses
- Non-flammable waste such as rubble, sand and glass
- Bulky waste (> 30 x 30 x 60 cm)
- Liquids
- Smoldering material
- Closed containers whose (former) contents are not immediately recognizable of whose it is not clear whether they may have hazardous properties.
- Packagings, not rinsed and/or with danger labels and/or symbols
- Insulation material

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Hoeing waste

Hoeing waste from maintenance of parks.

Accepted

- Howing waste, pruning waste
- Bushes, weeds
- Wood chips (from fresh wood)
- Wood bark

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- Tree trunks
- Manure or fertilizers (Contaminated) soil/sand
- Trees/branches with fungi

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Silicone rollers in boxes

Label backs of labels in rolls

Accepted

- Label backs
- Rolled up on rolls with a minimum diameter of 12 cm
- Rolls should be stored properly stacked in cardboard boxes
- Color: white, natural or brown

Forbidden

- Loose silicone paper
- No stickers, labels or other contamination

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Pruning wood

Pruning waste from trimming trees and shrubs

Accepted

- Pruning wood
- Shrubs
- Wood chips (from fresh wood)
- Wood pulp

Forbidden

- Hazardous waste
- Construction and demolition waste
- Industrial waste
- (Roadside) grass
- Tree trunks
- Plants
- Manure or fertilizers
- (Contaminated) soil/sand
- Trees/branches with mold
- Leaf litter

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Technically non-recyclable waste (TNW)

Technically non-flammable and/or recyclable wastes.

Accepted

- Non-flammable, non-recyclable wastes and wastes which are not technically processable, i.e. they cannot be made suitable for incineration and/or recycling even by mechanical treatment.

Forbidden

- Chemical waste
- Asbestos or asbestos-like waste
- Explosives
- Hospital waste
- Radioactive waste
- Electronic waste and white and brown goods
- Strong dusty or smelly waste
- Tires
- Cadavers
- Bulky waste (> 30 x 30 x 60 cm)
- Liquids
- Smouldering substances
- Closed packaging of which the (former) contents are not immediately recognisable, or of which it is not clear whether they have any potentially hazardous properties
- Packagings, not rinsed and/or with danger labels or symbols

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Green house foil

Foil originating from green houses and/or from clearing greenhouses.

Accepted

- Foil from horticulture inseparably mixed with materials normally used in plant cultivation, such as nutrient soils, ropes and clips
- Plants and remains of plants
- Rolled up and presented in bundles

Forbidden

- Waste materials other than horticultural foil containing horticultural related materials
- Large amounts of soil or foliage
- Hazardous waste and small hazardous waste (KGA)

Due to the nature of this stream, it is processed as technically non-combustible waste. It is therefore essential that this waste stream does not contain any regular waste materials such as residual waste, paper/cardboard, stretch film or wood. This leads to rejection by the processor, following by very high sorting costs, which are charged to the customer.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Confidential paper

Paper containing confidential information.

Accepted

- Office paper

Forbidden

- Wet cardboard or paper
- No contamination as cardboard, newspapers, sheets, binders, plastic folders and plasticized paper and cardboard
- As little contamination as paperclips, staples etc
- Contamination of the paper with other waste products

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Flat glass

Glass, flat and flat, from buildings; homes; glaziers, among others.

Accepted

- Single glass both clear and colored
- Double glass or insulation glass
- Laminated glass, flat glass with pvb foil in between: no plexiglass (!)
- Car windows
- Glass roof panels
- Greenhouse glass, horticultural glass
- Armor glass only in consultation (due to the composition of the amount of plates of glass)
- Mixed glass: mix of different types of flat glass

Forbidden

Contaminants that interfere with the recycling process and should not be present in the flat glass:

- Materials differ chemically and are not allowed
- Glass bottles and jars
- Ceramic, stone, porcelain. This includes plates, cups, pottery, etc. Listed materials interfere with the melting process in the glass furnaces. An excessive proportion of jar, stone and porcelain may result in weight deduction or rejection
- Heat-resistant glass, laboratory glass, oven dishes, hot plates and stove panes
- Plexiglas
- Mirrors, mirror glass
- Window frames with windows and glass building blocks are not allowed.

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Packaged food products

Packaged expired products, retail food returns, GFE households, and Cat. 3 materials. By expired products, foodstuffs, and GFE, we mean products that are not suitable for consumption or sale.

Accepted

- Food products in plastic and paper
- Packaged fresh produce (potatoes, vegetables, fruit)
- Dairy (milk, pudding)
- Special types of bread and cookies

Offer without separation:

Packaged products past their expiration date

- Pastries (other types of bread (such as baguettes, rye bread, and pastries), sausage rolls and sausage rolls, flour products, pasta and rice products, rusks, toast, crisps and nuts, gingerbread, cookies, and pastries)
- Overig (voorverpakt en behandeld vlees en vis, frisdranken, chocolade en suikerwerken, vleeshoudende producten (bijv. pizza's en salades), eieren, vers vlees, onbehandeld en verse vis in plastic zak)

Forbidden

- Unhygienic matters
- Heavily moldy or spoiled food
- Glass packaging or tin packaging
- Non-food items (e.g., soap)
- Residual waste from waste bins
- Dust

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

- Accepted
- Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Pure rubble, fine

Stone, concrete and other debris from construction and demolition work

Accepted

- Only stone-containing materials from construction, renovation and demolition without contaminants, with the exception of the reinforcement. For example; masonry rubble, paving rubble, concrete rubble with or without reinforcement, cured residual concrete and masonry mortar, floor and wall tiles. If the contamination exceeds 10%, the freight offered will be accepted as construction and demolition waste. The quantity of sand-lime brick and asphalt may not exceed 10%
- Maximum size is 60x60 cm

Forbidden

- Hazardous waste
- Construction and demolition wastes
- Industrial waste
- Gypsum products: Gas concrete; Giboblocks
- Asphalt
- Rubble, plasterwork rubble
- Sand/soil > 5%
- Contaminated sand/soil
- Chimney debris
- Asbestos or asbestos-like material
- Rubble and concrete debris originating from suspected locations such as; gas stations, auto demolition sites, remediation sites

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

Pure rubble, coarse

Large pieces of stone, concrete and other debris from construction and demolition work

Accepted

- Only stone-containing materials from construction, renovation and demolition without contaminants, with the exception of the reinforcement. For example; masonry rubble, paving rubble, concrete rubble with or without reinforcement, cured residual concrete and masonry mortar, floor and wall tiles. If the contamination exceeds 10%, the freight offered will be accepted as construction and demolition waste. The quantity of sand-lime brick and asphalt may not exceed 10%
- Maximum size is > 60x60 cm

Forbidden

- Hazardous waste
- Construction and demolition wastes
- Industrial waste
- Gypsum products: Gas concrete; Giboblocks
- Asphalt
- Rubble, plasterwork rubble
- Sand/soil > 5%
- Contaminated sand/soil
- Chimney debris
- Asbestos or asbestos-like material
- Rubble and concrete debris originating from suspected locations such as; gas stations, auto demolition sites, remediation sites

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

100% natural foil: transparent/clear/colorless

Several types of clean (packaging) foil from the distribution sector, shopping companies and the industry etc.

Accepted

- 100% natural foil: 100% clean and transparent colorless foil without any form of contamination (no stickers, pull tabs, papers etc.)

Forbidden

- Laminate/aluminum laminate foils (mostly from the food industry)
- Tape or sticker backing or labels
- Argicultural or horticultural foil, contaminated construction foil and foam foils
- Thermoformed or vacuum pulled foil (PET or PS)
- Packaging foamed (EPS, EPE, EPP)
- Other plastics such as big bags, strapping and hard plastics
- Contaminated plastics (paint, cement, grease and food residues)
- Other non-plastic materials such as hazardous waste, wood, metals and inert streams etc
- Plastic cups and bottles

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden

The most current version of our acceptance criteria can be found at www.valorgroep.com

90/10% natural foil: transparent/clear/colorless

Various types of clean (packaging) film from the distribution sector, retail companies, industry, etc.

Accepted

- 90% natural film: clean, transparent, colorless film without any contamination (so no stickers, zip ties, paper, LDPE, etc.)
- Maximum 10% colored foil

Forbidden

- Laminate/aluminum laminate films (often from the food industry)
- Tape or sticker residue, labels
- Agricultural or horticultural film, contaminated construction film, foam film
- Deep-drawn or vacuum-drawn film (PET or PS)
- Packaging foam (EPS, EPE, EPP)
- Other plastics such as bulk bags, straps, hard plastics
- Contaminated plastics (paint, cement, grease, food waste)
- Other non-plastic materials such as hazardous waste, industrial waste, metals, wood, inert flows, etc.
- Plastic cups and bottles
- Bubble wrap and airbags

If, upon delivery, any deviations from the agreed specifications or conditions are identified, we reserve the right to refuse the shipment concerned. Alternatively, where acceptance remains possible, the shipment may be accepted subject to revised conditions. In the event that hazardous substances and/or Substances of Very High Concern (SVHC), or (waste) materials containing SVHC, are present, this must be reported immediately. SVHC refers to substances identified under the European REACH Regulation as substances of very high concern. Your obligations and the available options for the segregation, handling and management of such materials are governed by applicable Dutch waste management and circular economy legislation.

■ Accepted ■ Forbidden
